

Anatomy Review

What are the 6 parts of the circulatory system?

What are the major purposes of blood?

What are 4 types of tissues?

What are your 5 main senses?

Which bones make up the axial skeleton?

What are 4 parts of the excretory system?

What are the 4 parts of the lymph system?	
 What are 3 parts of the nervous system?	
 What are some parts of the respiratory system?	
What is your endocrine system?	
 What are some parts of the digestive system?	
What are the 3 kinds of muscle?	

Anatomy Review: Word Bank

Connective	Pharynx	Stomach
Protection	Esophagus	Arteries
Skin	Red & White Blood Cells	Livers
Brain	Nerve	Veins
Communication	Messages	Bloodstream
Taste	Urinary Tract	Hearing
Thymus	Lymph Nodes	Spleen
Intestines	Heart	Glands
Sternum	Spinal Cord	Skeletal
Bronchioles	Regulate Temperature	Mouth
Large Intestine	Platelets	Lymph Vessels
Nose	Larynx	
Small Intestine	Lungs	
Capillaries	Transportation	
Organs	Cranium	
Smell	Bronchi	
Cardiac	Touch	
Epithelial	Vertebrae	
Hormones	Nerves	
Ribs	Alveoli	
Muscle	Lungs	
Smooth	Sight
